SOFTWARE DEVELOPMENT & ENGINEERING | Veritium’s services are designed to meet a variety of client needs. Our experts lead design efforts for new systems, modernize legacy systems, and provide sustainment and integration services for a number of mission-critical applications. We utilize the software TDD process and apply the SAFe® methodology to ensure quality through SQA and IV&V procedures.

ENTERPRISE OPERATIONS | Information technology is not the goal; it is there to support your mission. We understand why service level agreements and uptime matter. Areas of Enterprise Operations we support include Service Desk & Desktop Support, Cloud Migration & Hosting Services, and Systems Integration.

TECHNICAL & PROGRAM MANAGEMENT | Our skilled teams deliver management, technical, and administrative services in support of high-priority Federal IT initiatives. Veritium’s technical services include Program Management Office Support, HCD, SOA & Design, and Acquisition Life Cycle Support. In delivering these services, we leverage industry accredited quality standards and practices, including the Project Management Institute’s (PMI’s) procedures for program management and Agile methodology.

CYBER SECURITY | Veritium is at the forefront of infrastructure defense and provides clients with the latest in vulnerability management, information assurance, and penetration testing. Our customers’ functions depend on the stable, safe, and highly-available infrastructure in which they operate. From design to operations, systems must comply with existing and developing security standards.

HEALTH SOLUTIONS | Veritium assists our customers in implementing technology to enhance care delivery, optimize clinical processes, and accelerate innovation in Federal Health. Our specific Health Solutions specialties include Electronic Health Record Integration and Predictive Analytics.

CLOUD SERVICES | Veritium actively supports the mission of government agencies’ demands for cloud computing by delivering a structured approach to managing complex IT environments in need of Cloud Services. We work to empower mission partners with the speed and flexibility to incorporate financial and technical cloud benefits into expansive business programs on their own timeline. Our Cloud Services include the holistic approach offered through a Cloud Adoption Framework (CAF) and through the incremental flexible approach delivered through our Cloud Migration & Hosting Services.

OUR CUSTOMERS

OUR RESOURCES bring varied technical and program management support services to all our clients. Our approach is to leverage a combination of commercially and federally recognized best practice frameworks.

Industry Standards Adhered to include:

PMBOK | ITIL | ISO | CMMI
